

**ECO FRIENDLY**  
AQUA POWER BATTERY

**NOPOPO™**  
H<sub>2</sub>  
NO POLLUTION POWER

### Strong points

1. Aqua Power Battery is very innovative products and it's brand new in the world. Differently from the conventional dry cell battery, it generates energy when any liquid containing H<sub>2</sub>O is injected inside such as water, juice, coke, saliva, urine and so on. It is unlike in terms of using water as electrolyte from conventional dry cell battery using harmful liquid such as mercury.
2. So, the battery has 20 years self life, provided it is kept in the original package as itself and it is possible to recharge the battery with water by three to five times.
3. As you know from that its concept is eco friendly, it doesn't contain any harmful materials. As the result, it contributes to preserving the environment.
4. Its weight is very light comparing to conventional dry cell battery, almost two third of usual dry cell.

\*Please remind that our Aqua Power Battery is defferent from the conventional dry cell battery.
